TOP100 AFRICA FUTURE LEADERS

2026 Empowerment Sessions

IMPACT REPORT

11 October to 2 November 2026 | Virtual programme

10
distinct sessions in the programme record

8
sessions with an archive recording

10 hrs
of scheduled or modelled session time

What the series covered

Top100 brought in speakers to help awardees build skills, share ideas and turn those ideas into work. The series covered money and careers, teamwork, AI, clear writing and speaking, and how to build something people need.

What we can show

The programme record names the speakers and topics. The archive lists recordings for eight sessions, including onboarding. The other two sessions appear on the calendar or programme posters. Page 2 shows which records back each entry.

How to read the numbers

The session counts describe programme records. The attendance figures on page 3 are a full-cohort scenario. We have no check-in records here to show who joined or how long they stayed.

01 / SPEAKERS AND TOPICS

The session record

Times are West Africa Time (WAT). A recording means the archive lists one. Scheduled entries come from the calendar and programme posters.

DATE / TIME	SPEAKER / TOPIC	RECORD
11 Oct 19:00-20:00	**Emmanuella Igboafu** Cohort onboarding	Recording
13 Oct 19:00-20:00	**Odinakachi Umunna** Beyond the Paycheck	Recording
17 Oct 19:00-20:00	**Nwosu Paul Light** From Idea to Scale	Recording
20 Oct* Time unlisted	**Cynthia Ohaeri** BLOOM: Positioning for World Class Opportunities	Recording
20 Oct 19:00-20:00	**Amos Ologunleko** From Recognition to Leadership	Recording
22 Oct 19:00-20:00	**Emmanuel Chukwu** Succeeding in a Tech-Driven Society	Recording
24 Oct 19:00-20:00	**Elisha Joseph** From Knowledge to Impact	Recording
27 Oct 19:00-20:00	**Samuel Ogunsola, PhD** The Collaboration Advantage	Recording
31 Oct 19:00-20:00	**Damilola Babatunde** The Global Opportunity Playbook	Scheduled
2 Nov 19:00-20:00	**Michael Akinsete** From Problem to Product to Market	Scheduled

* BLOOM uses its poster date. The calendar also repeats the leadership topic on 30 October. We count the topic once, using the archive date of 20 October. The calendar lists the product-to-market talk on 2 November after a change from its poster date.

What the figures mean

Full-cohort scenario

A Top100 directory snapshot on 2 November 2026 listed 1,341 eligible 2026 awardees. To model full attendance, we assume all 1,341 attended all ten sessions for the whole hour. Nine calendar entries had a one-hour slot. We used one hour for BLOOM because its time was unlisted.

13,410

modelled session visits and learner-hours

1,341 awardees x 10 sessions x 1 hour

A session visit counts one person joining one session. A learner-hour counts one hour for one person. The same person can count more than once. This model shows what full attendance would add up to. Actual attendance and time spent could differ.

What to check next

Check who joined and how long they stayed. Ask awardees which skills they used after the series. Follow up on interviews, paid work, and projects after 30 or 90 days. Those checks can show what changed for people.

Sources

Top100 past sessions archive for session topics, speakers and recordings. The programme calendar supplied dates and one-hour time slots.

Programme posters for BLOOM, Global Opportunity Playbook, and From Problem to Product to Market supplied speaker credits and advertised details.

Top100 directory review, 2 November 2026, supplied the count of eligible awardees used in the scenario.
